Chime tube set, approx. Ø8x80/80/110/140mm, 3 pcs	800060	1
Cotton – bead cord, approx. 160m, 1mm, natural	537012	1
Jute yarn natural, approx.Ø3,5mm x 55-60m, approx. 200g	525163	1
Birch bark bundle, approx. 10x100mm, 28pcs, natural	943650	1
Acrylic spray varnish 200ml, transparent mat, weatherproof	570129	1

Recommended materials/tools

Ring cutters, set, approx.Ø29-112mm, 14 pcs	541375	1
---	--------	---

Required tools

Protective mat, modelling rollers, embossing roller, circle cutter, sharp knife (or FIMO cutter), scissors, wooden skewers, drill with wood drill approx.Ø2cm, brush, water glass, kitchen roll, branch.

1 Take the air drying modelling material. Roll it to have 5mm thick plate.

2 Emboss the pattern using the Marabu Art Roller. Do the same with other plates using different patterns.

3 Cut the circles of different sizes from the embossed modeling plates. Or prepare different shapes using the knife. Drill two holes in each piece. (Later, you run the beads cord through these holes.) Shape the balls of different sizes. Push a wooden skewer through the center of the balls. Leave prepared pieces and balls to dry, approx. 1-3 days. When dry, paint the beads and pendants according to your wish. Let the paint dry. If you're your wind chimes hang outside, protect the decorations with the weatherproof varnish.

4 Drill the holes in the branch. Drill two holes in each birch piece.

Now thread pendant, beads, birch pieces and chime tubes on a piece of bead cord. The length of the cord pieces may vary. Start with the chime tubes and thread on the remaining deco elements. Insert the end of the bead cord through a hole in the branch. Fix the bead cords by passing them through a bead and making the end knot. Attach the remaining deco elements hanging them on the branches. Hang branches on the jute yarn.

OPITEC Creative team wishes you lots of fun!
