

Modelled Cats

Used Material (both cats)

	Article No.	Qty
SIO-2 PLUS soft clay, 1000 g, white	503088	2
COLOURplus modelling clay, 900 g, set of 12	517750	1
Styrofoam cone, approx. ø 70 x 120 mm (cat small)	547134	1
Styrofoam cone, approx. ø 90 x 200 mm (Cat large)	547145	1
Patina Set rust effect	474478	1
Aluminium wire, approx. ø 2,0 mm x 2 m	201431	1

Recommended Tools/Material

(Disposable) gloves, 100 pieces, size M	936396	1 or
(Disposable) gloves, 100 pieces, size L	942458	1
Modelling roller, approx. ø 25 x 200 mm	807196	1
Fimo cutter set, about 110-150 x 20 mm, set of 4	527333	1

Needed Tools

Scissors, baking paper, modelling roller, sharp knife, cling film, water cup, brush, side cutters

1 Apply rust effect on the product manually. Colour the aluminium wire with rust effect.

2 Roll an approximately 5 mm thick plate of soft clay.

3 Wrap the matching styrofoam ball with a cling film.

4 Put the soft clay plate around the cone and cut the clay at the bottom of the cone succinctly. Smooth the edges with water.

5 Modell the medallion (head), ears, eyes and nose of clay, matching to the size of the cone.

Fix the items with some clay and water to the cone.

Knead COLOURplus modelling lukewarm. Use (disposable) gloves as the modelling can bleed. Mix the desired colours with white Colour Plus, the colours get a pastel colour. Roll out different coloured cords (Thickness approx. 5 mm).

Wrap the coloured strings around the cat body and press.

Cut out circles in different sizes of soft clay for the collier pendant. Put the circles together as desired and drill a hole at the top of the pendant. Let the pendants dry. Cut pieces from the rusted wire for the whiskers and the tail. Form both and stick into the wet clay. Let the soft clay figure dry overnight until it has reached a stability. Remove the cone from the figure. Let the figures dry 1-2 days. Coat soft clay pendant and cat eyes with rust effect. Form a necklace from the rusted wire, hook in the pendant and put it around the cat's neck.
