Disposable Protective Gloves, Size M, 100 pieces	936396	1 or
Disposable Protective Gloves, Size L, 100 pieces	942458	1
Required Tools (Tools/ Material are not included in delivery)		
Surface, Scissor, Kitchen Roll, Mosaic Pliers, Tweezers, Crackle Knocker, Spattle, Measuring Cup, Mixing Bowl, Spatula, Sponge, Cloth, Disposable Gloves		

1
Glue the mosaic stones on the lamp. Use the 3D-Silicon Glue. The stones can be broken into pieces with the mosaic wheeled glass nippers before.

2
Apply silicone glue on the lamp and place the Crackle/Safety Mosaic on it. Crack the Mosaic with the crackle mosaic hammer. The fugues jump up, the surface increases. Let the silicone application dry overnight. (picture: the light-blue board is the crackle safety mosaic and it's glued around the dark-blue stone)

3
Mix the mosaic grout with water according to the product instructions. Add black colour to colour the grout. Put the disposable protective gloves on. Distribute the grout on the mosaic surfaces. After approx. 15 minutes take the excessive grout off. Use a sponge for this procedure. Repeat this process several times. Let the grout dry overnight and polish the mosaic surfaces with a dry cloth.

*Have fun!
