Tools Required		
Working pad, baking paper, modelling roller, sharp knife, Fimo cutter, wet wipes, baking tray, baking oven		

1
Knead desired modelling clay warm with hands.
For each colour roll out an approx. 2 - 3 mm thick slab with the modelling roller (or clay machine).

2
With the modelling tool press the modelling clay onto the texture mat.

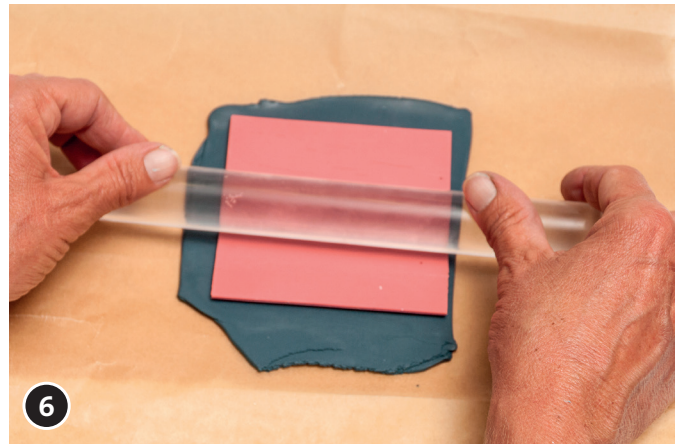

3
Apply modelling clay onto the whole texture mat. Depressions of the design should be filled up completely.

4
With the Fimo cutter remove the Fimo layer until Fimo stays only in the depressions.

5 Roll out an approx. 2 - 3 mm thick slab from black Fimo with the modelling roller (or clay machine). The size of the slab should correspond to the size of the letter.

6 Place front side of the filled texture mat on black slab. With the modelling roller roll up the design of the texture mat.

7 Carefully remove the texture mat.

8 Place letter on the decorated modelling clay. Cut out the shape of the letter with craft knife.

Cure sculptured letter for 30 minutes in the oven at 110°C. Then spray paper art letters completely with varnish and allow to dry. Fix the sculptured letter to the coloured paper art letter with the glue gun (or craft glue).
