Accessories for Communion

Concrete Sailboats

Material Used	Article Number	Quantity
Casting Mould - Sailboat, approx. 190 x 180 mm, approx. 40 mm high, Material Requirement: approx. 1300 g Creative Concrete	811119	1
Casting Mould - Sailboat, approx. 280 x 265 mm, approx. 40 mm high, Material Requirement: approx. 3000 g Creative Concrete	811120	1
Release Agent - Formestone, 100 ml	480666	1
Creative Concrete CreaStone 1000 g	570130	as required
Creative Concrete CreaStone 2500 g	570152	as required
Creative Concrete CreaStone 8 kg	572084	as required
Deco & Lifestyle Hobby Paint, 230 ml, white	446228	1
HOOKED Jute, approx. 45 m, approx. ø 4 mm, mint	616649	1
Wooden Stamp - Lighthouse, approx. 45 x 95 mm, stamp: approx. 50 x 100 x 25 mm	811773	1
Wooden Stamp - Halleluja, approx. 115 x 25 mm, stamp: approx. 120 x 30 x 25 mm	811751	1
Stamp Pad - Mini, Chalk Paint, approx. 45 x 25 mm, anthracite	551774	1
Photo Cardboard, 300 g/sqm, approx. 50 x 70 cm, 10 sheets, mint	612852	1
Recommended Tools		
STEINEL® Glue Gun Gluematic 3002	319101	1
Glue Sticks, approx. ø 11 x 200 mm, 25 pieces	301139	1
UHU All Purpose Glue, 35 g	312877	alternatively
Disposable Protective Gloves, 100 pieces, Size M	936396	1
Disposable Protective Gloves, 100 pieces, Size L	942458	alternatively

Concrete Fishes

Material Used	Article Number	Quantity
Casting Mould - Fishes, 1 mould, 4 motifs, approx. 75 - 145 x 37 - 74 mm, approx. 40 mm high, material requirement: approx. 960 g creative concrete	811108	1
Release Agent - Formestone, 100 ml	480666	1
Stamp for Casting - Christian Fishes, approx. 30 x 15 mm, 40 x 15 mm and 50 x 14 mm, set of 3	810870	1
Stamp for Casting - Christian Fish, approx. 52 x 37 mm	810847	1
Adhesive - Magnetic Varnish for Stamps, 100 g	300270	1
Creative Concrete CreaStone 1000 g	570130	as required
Creative Concrete CreaStone 2500 g	570152	as required
Creative Concrete CreaStone 8 kg	572084	as required
HOOKED Jute, approx. 45 m, approx. ø 4 mm, grey	616672	1
HOOKED Jute, approx. 45 m, approx. ø 4 mm, cream	616661	1
HOOKED Jute, approx. 45 m, approx. ø 4 mm, mint	616649	1
Wooden Stamp - Fish, approx. 85 x 37 mm, stamp: approx. 90 x 40 x 25 mm	811762	1
Stamp Pad - Mini, Chalk Paint, approx. 45 x 25 mm, anthracite	551774	1
Photo Cardboard, 300 g/sqm, approx. 50 x 70 cm, 10 sheets, mint	612852	1
Recommended Tools		
STEINEL® Glue Gun Gluematic 3002	319101	1
Glue Sticks, approx. ø 11 x 200 mm, 25 pieces	301139	1
UHU All Purpose Glue, 35 g	312877	alternatively
Disposable Protective Gloves, 100 pieces, Size M	936396	1
Disposable Protective Gloves, 100 pieces, Size L	942458	alternatively
Tools Required		
work pad, ruler, pencil, scissors, kitchen roll, measuring cup (or scale), mixing bowl, whisk (or spatula), (disposable) protective gloves, bristle brush, round brush water tank, knife, hot glue gun with glue sticks		

Instruction

(for concrete sailboats and concrete fishes)

1. Generously apply Formestone to the interior surface of the casting mould (according to product instruction) and allow to dry.
2. If desired, fix the stamp in the mould with pressure-sensitive adhesive (according to product instructions).
3. Mix creative concrete according to product instruction.
4. Completely fill up the casting mould with concrete.
5. Allow to harden for 1 - 2 days.
6. Remove concrete model out of the mould, remove stamp.
7. Allow residual moisture to escape from the concrete.
8. Outline with white Deco & Lifestyle hobby paint if necessary.
9. Stamp mint-coloured photo cardboard with motif, cut cardboard into shape.
10. Glue the photo cardboard with stamp motif onto the concrete model (hot glue gun/ all-purpose glue).
11. Decorate concrete models with HOOKED jute yarn (fix the yarn with glue gun).

Give Away - Magnetic Concrete Holder

Material Used	Article Number	Quantity
Mould - Circle, approx. ø 55 mm, approx. 35 mm high, Material requirement: 120 g creative concrete	810984	1
Mould - Circle, approx. ø 75 mm, approx. 35 mm high, Material requirement: 220 g creative concrete	810995	alternatively
Mould - Square, approx. 55 x 55 mm, approx. 35 mm high, Material requirement: 180 g creative concrete	811005	1
Mould - Square, approx. 85 x 85 mm, approx. 35 mm high, Material requirement: 350 g creative concrete	811016	alternatively
Release Agent - Formestone, 100 ml	480666	1
Stamp for Casting - Cross and Thanks, approx. 23 x 23 mm and 28 x 24 mm, set of 2	810869	1
Stamp for Casting - Thanks, approx. ø 45 mm	810858	1
Adhesive - Magnetic Varnish for Stamps, 100 g	300270	1
Creative Concrete CreaStone 1000 g	570130	as required
Creative Concrete CreaStone 2500 g	570152	as required
Creative Concrete CreaStone 8 kg	572084	as required
Deco & Lifestyle Hobby Paint, 230 ml, white	446228	1
Disc Magnet Neodymium, surface galvanized, approx. ø 10 x 2 mm, 24 pieces	209677	1
Magnet Holder, approx. 80 x 10 mm, set of 2	522470	1

Recommended Tools	Article Number	Quantity
Disposable Protective Gloves, 100 pieces, Size M	936396	1
Disposable Protective Gloves, 100 pieces, Size L	942458	alternatively
Tools Required		
work pad, scissors, kitchen roll, measuring cup (or scale), mixing bowl, whisk (or spatula), (disposable) protective gloves, bristle brush, water tank, knife		

Instruction

1. Generously apply Formestone to the interior surface of the casting mould (according to product instruction) and allow to dry.
2. Fix the stamp in the mould with pressure-sensitive adhesive (according to product instructions).
3. Mix creative concrete according to product instruction.
4. Completely fill up the casting mould with concrete.
5. Allow the concrete to dry for approx. 15 minutes.
6. Place the magnet and fix it in place with the magnet holder.
7. Allow to harden for 1 - 2 days.
8. Remove magnet holder.
9. Remove concrete model out of the mould, remove stamp.
10. Allow residual moisture to escape from the concrete.
11. Outline with white Deco & Lifestyle hobby paint if necessary.

Give Away - Soaps

Material Used	Article Number	Quantity
Soap Casting Mould - Basic Forms, 1 mould 5 motifs, approx. 55 - 70 mm, approx. 20 mm high, Material requirement: approx. 350 g casting soap	443529	1
Stamp for Casting - Cross and Thanks, approx. 23 x 23 mm and 28 x 24 mm, set of 2	810869	1
Stamp for Casting - Thanks, approx. ø 45 mm	810858	1
Adhesive - Magnetic Varnish for Stamps, 100 g	300270	1
Casting Soap 300 g, white	498960	2
Casting Soap 1000 g, white	498993	as required
Soap Pigment Opaque 10 ml, ocean blue	466118	1
Soap Pigment Opaque 10 ml, ivory	466152	1
Soap Pigment Opaque 10 ml, aubergine-coloured	466093	1
Soap Pigment Opaque 10 ml, apricot	466082	1
Soap Pigment Opaque 10 ml, stone grey	466163	1
Soap Scent Oil, 10 ml, lime	481189	1
Soap Scent Oil, 10 ml, green apple	497241	as required
Soap Scent Oil, 10 ml, rose	497171	as required
Soap Scent Oil, 10 ml, cherry blossom	481204	as required
Soap Scent Oil, 10 ml, peach blossom	437962	as required
Soap Scent Oil, 10 ml, lavender	481178	as required

Recommended Tools	Article Number	Quantity
Melting Pot, capacity 1 l	486570	1
Tools Required		
scissors, baking paper, teaspoon, pickle jar and saucepan for water bath (or melting pot), sharp knife, bristle brush, water vessel, kitchen roll		

Basic Instruction for Soap Casting

To cast soap layers of different colours, for every soap layer you have to melt and dye soap separately. To achieve different shades of colour soap pigments can be mixed among each other.

You can add soap fragrance simultaneously with the pigment.

To avoid mixing of the individual soap layers, take care to pour liquid soap only on layers that have cooled down sufficiently.

To be sure you can observe a "skin" forming on the cooled layer similar to the one on self made pudding.

Then you cautiously can pour another soap layer.

Pour the individual coloured layers into the desired casting mould.

Then allow the soaps to air dry.

Remove the soaps from the mould. If they don't come out easily put them into the freezer for approx. 10 minutes and then pour warm water on the back side of the casting mould. Then the soaps will slide off the mould easily.

Instruction

Place the stamp in the soap mould with the motif face up. In advance apply adhesive varnish on the underside of the stamp (brush) according to the product instructions of the adhesive varnish.

Pour soap into the moulds as described in the basic instruction.
Remove cooled off soaps from the moulds and take out the soap labels.
