Craft set

“ Fabric flower and heart ”

Dear Opitec customer

Congratulations on purchasing this creative set

Our creative team has designed this attractive fabric flower and stand for you to make at home

The following instructions should help you to achieve success

We wish you fun and enjoyment with this project

Contents	
Fabric pieces, blue (20 x 30cm)	1
	1
Wooden stand, 2 pieces , natural	1
Craft felt, green (20 x 30cm)	
Instructions	

Recommended tools

Sewing machine, Hot glue gun, Filling,
Satin ribbon,
Beads
(Not included in the set)

Instructions

All the lines marked -----on the patterns must be left open

Flower:

Cut out the patterns for the flower and the circle (lay this to one side)

Fold the blue fabric so that you are working on the reverse side and lay the patterns on top so that they fit.

Draw around the patterns with chalk

Nr.1:

You are working on the reverse side of the fabric. Cut out the material around the flower (do not cut the flower shape) and sew around the flower inside the line

(0,3cm) This stops the blue fabric from stretching when the flower shape is cut. Leave about a 4cm hole for the filling. (about one petal)

Cut out the flower by cutting around close to the sewn line as this makes a better finish

Turn the flower inside out so that the correct side comes to the front and fill the flower with cotton filling or similar until the shape you require is reached. Do not sew up the opening yet until the stand is added at a later stage

Repeat the process with the smaller flower head

On the small flower head you can sew up the hole once the filling is complete

Fold the material in on the opening to make it neat

Once complete you can join the small flower head on the larger one with just a few stitches

Nr. 2

The circle is made from the flowery fabric

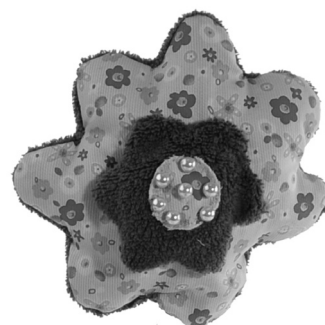

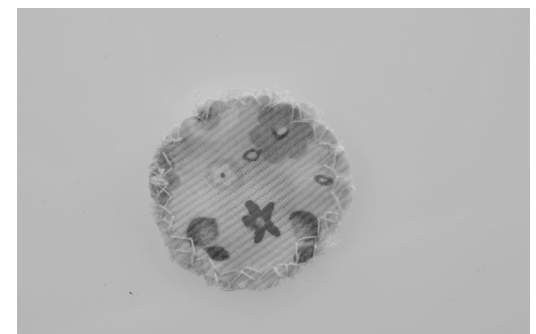

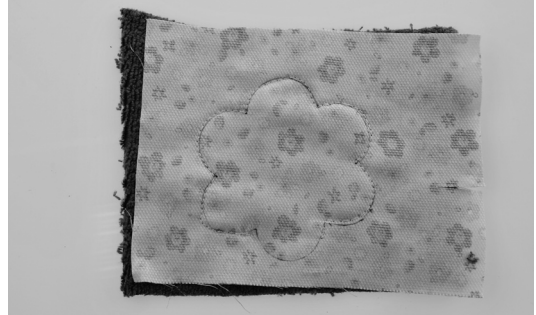

Cut out the small circle and stitch around the outside with a zick zack stitch (No turning necessary)

Arrange and sew beads on as decoration

Now lay the circle on the flower and fix it with a few stitches

The flower head is now ready

Next come the leaves

Nr.3

Cut out the pattern for the leaves and lay them on the doubled felt . Sew around the leaf pattern leaving the broken line part free

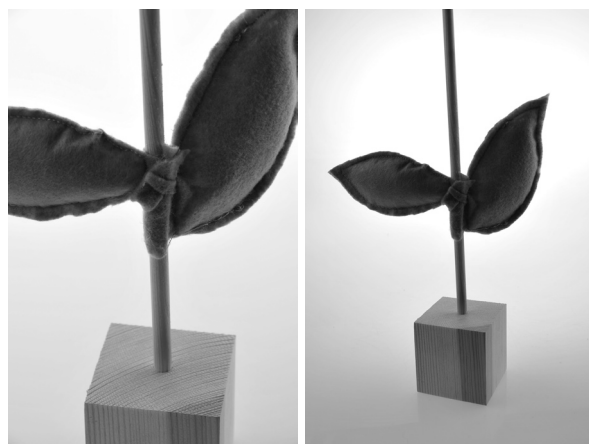

Fill the leaf as you wish and then over sew the filling opening together

Complete the second leaf as the first

Now glue the leaves to the wooden stand with a hot glue gun
Wrap the ends of the leaves around the wooden stem about 10cm above the base

Mount the finished flower on top of the "stem" through the opening in the flower and fix it in position

It may need a few stitches to finish and make it neat

Nr.4

Fold the checked fabric over and lay the patterns for the heart on top. Draw around the shapes with a pencil or chalk . Remember you are working on the reverse of the fabric

Sew around the shape of the heart leaving a filling gap of 2-3cm (On the side is best). Cut out the shape and turn the material the right way around, fill it as you require

Finally close up the hole and sew the gap

Fasten the ribbon on the middle of the heart with a few stitches
